HORIZON-WIDERA-2024-ERA-01-04: Strengthening researchers' skills for better careers – leveraging the European Competence Framework for Researchers

Rationale:

- Skills are of utmost importance for researchers, they allow them to perform high quality research, and to make the overall European R&I system competitive and challenges-proof

Objective:

- To equip researchers with transversal skills that allow them to be interoperable between academia and the non academic sector

Expected Outcome:

- Researchers at all career stages **equipped** with a **comprehensive set of transversal skills based on ResearchComp**
- **Coordination and exchange of best practices** for the improvement of research and transversal skills training;
- Meeting of **labour market demands** by strategic partnerships of jointly developed training programmes
- Contribution to **certification of microcredentials**.
- Improved **communication of science to the public**, to make research careers more appealing to younger generations.

European Skills, Competences and Occupations (ESCO) classification

European Competence Framework for Researchers (ResearchComp)

CSA
0,5 M€ (1 proy)

A destacar:

- Researchers at all career stages
- Strategic partnerships of training providers with labour market actor in the developing of training programmes
- Certificación (Microcredenciales)
- European Skills, Competences and Occupations (ESCO) & European Competence Framework for Researchers.
- Science Communication Skills
