## CERIS - Community for European Research and Innovation for Security

Aiming to facilitate interactions within the security research community and users of research outputs, in 2014 the Commission established the Community of Users for Safe, Secure and Resilient Societies (CoU), which gathered around 1,500 registered stakeholders (policy makers, end-users, academia, industry and civil society) and regularly held thematic events with the security research community. Now named the Community for European Research and Innovation for Security (CERIS), this platform continues and expands the work of the CoU, in light of the forthcoming Horizon Europe developments between 2021-2027.

**Save the Date - Info Days for Horizon Europe Cluster 3 (Civil Security for Society) to take place on 27-28 June 2023 in Brussels**

Through Horizon Europe Cluster 3 "Civil Security for Society", the European Commission funds research and innovation projects to address the challenges arising from persistent security threats. These projects relate to the fight against crime and terrorism, external and border security, disaster resilience, cybersecurity and the protection of critical infrastructure.

The European Commission adopted the Cluster 3 Work Programme 2023 – 2024 in December 2022, and then revised in March 2023 to increase available budget by €50 to add new research topics and fund more projects, over the next two years.

The Calls for proposals under the Work Programme 2023 are now due to open on 29 June this year.

Researchers who wish to know more about the different research topics and the application procedure, including the legal and financial aspects to be taken into consideration, are invited to participate to the yearly "Cluster 3 Info Days and Brokerage Event" on 27 and 28 June 2023 respectively, in Brussels.
