PhD reference date

! WP2023: PhD reference date for the calculation of the eligibility period from the date of the actual award according to the national rules of the country where the degree was awarded to the date of the successful PhD defence.

De acuerdo con el **Real Decreto 1002/2010, de 5 de agosto, sobre expedición de títulos universitarios oficiales, en su artículo 3, punto 4 establece lo siguiente:**

4.Los títulos universitarios oficiales, expedidos de conformidad con lo previsto en este real decreto, surtirán efectos plenos desde la fecha de la completa finalización de los estudios correspondientes a su obtención.

La fecha de expedición del título se corresponde con la fecha de abono de las tasas para su expedición. **La legislación española dice**, por tanto, **que es la fecha de completa finalización (cumplimiento del último de los requisitos = día de lectura)**, no el de expedición, **lo que hay que considerar.**

<https://www.boe.es/buscar/doc.php?id=BOE-A-2010-12621>

Por tanto, para el caso de los títulos de PhD expedidos en España, no cambia nada. **Se seguirá considerando el día de defensa del título, como hasta ahora.**

El/la PI lidera el proyecto (no hay más PIs que generen consorcio o que sumen para evaluar el perfil individual)

El PI elige a sus **team members**, que participarán en este proyecto ERC.

Team members: personal de investigación de cualquier nivel: PhD students, Postdocs, personal técnico, personal especialista (senior staff), ...

A nivel de propuesta se definen roles necesarios.

A nivel de propuesta, los **team members** deben estar asignados a tareas/objetivos concretos del proyecto. Su participación debe ser necesaria.

Team Members

Los **team members** pueden ser del grupo de investigación o pueden ser nuevas personas. Pueden estar en la Host Institution o en otra institución.

Ejemplo:

El PI necesita tener a un posdoc trabajando en una institución alemana ya que ahí hay equipamiento especializado para llevar a cabo algunos experimentos necesarios para la acción.

Opciones (máxima flexibilidad)

How to choose submission panel?

You are presenting a proposal involving (potentially) an important scientific advance

- **In which field?**
- **Which panel is covering that field?**

This is the panel which will have the evaluators best suited to appreciate the work you propose
- **Which descriptor(s) best cover it?**

Note that the panel should correspond to the first descriptor (or vice-versa)
- **Do not indicate a secondary panel or descriptors for: an instrument or technique used** (and not developed)
- Choose descriptors significant to the **advances** your proposal will bring

ERC Evaluation panels

27 panels (11 PE, 9 LS, 7 SH)

Each panel is composed by **16-18 panel members**.

The panel chair is known during the evaluation however the composition is made public once the results are published.

A panel may not include an expert in your discipline , they are semi-generalists

Students and students:

During the past ten years I have supervised 11 PhD thesis, six are still in progress, of which two are scheduled to defend this academic year. Of the five who have defended during this time, one is an associate professor at UC3M La Jolla, after postdoctoral in Harvard, one is a lecturer at the U. Carlos III in Madrid, after postdoctoral at Berlin, one is a lecturer at Cambridge, after postdoctoral at Stanford, one is working at the European patent office at The Hague (but still active in research), and one is still a postdoc with us. I have hosted six external postdocs, two of them still with us. One (Spanish) is an associated professor at U. Polit. Valencia, another one (Japanese) is a research professor at Tohoku U. Kyoto, another one (Turkish) is a assistant professor at the Istanbul Tech, U. and a final one (UK) is doing a second postdoc at the U. Florida Gainesville. As part of the Madrids project, we have hired eight faculty visitors, for periods longer than a month, mostly at the junior level. Several of them are still working on joint publications with our students or postdocs. At least in one case (Gómez, originally a visiting postdoc but now faculty at ETH Zurich), the relationship has resulted to one of my students writing him for a month to finish a joint paper. There have also been about four master thesis during that time. Most of them have continued as local PhD students, but one is now pursuing his PhD at Caltech.

Section c: Early achievements track-record

Since my first peer-reviewed article in 2002, I have gradually achieved internationally recognition as a leading scholar of migration. My primary areas of expertise have been **migration processes** and the subsequent **transnational practices**. I have maintained a disciplinary identity as a human geographer, but also engaged extensively with migration research in a range of other disciplines, reflected, for instance, in co-authorship with both economists and anthropologists. Much of my research has been **theoretically oriented**, based on **empirical data**. I have invested in **broad methodological competence**, yielding expertise in both ethnographic fieldwork and survey data collection, and command of corresponding specialized software (*Stata, NVivo*).

I have published **27 articles** in international peer-reviewed journals and **14 book chapters**. About half have been single-authored. In addition, I have co-edited **four special issues** of international peer-reviewed journals and **two books**, and written about 30 non-peer-reviewed scientific reports and briefs. RESEARCH COMMUNICATION

I have become increasingly committed to excellence in research communication, and followed up on this commitment through learning, teaching, and practice. For my own research, I have acquired skills in visualization techniques, video production, and social media. I have developed a personal web site (jorgencarling.org), an online resource on the meaning of "migrant" (meaningoffragments.org) and a research-oriented Twitter account with 3400 followers (notforownjorgencarling). I have also contributed to influential blogs, including the *IMI Impact Blog* and the *World Economic Forum Agenda*.

An analytical review article that examines bottlenecks and potential in migration research over the past fifteen years, identifies 'two-step approaches' and informs the current proposal.

A theory-building article that draws upon more than 100 ethnographic studies of migrant remittances and makes sense of the dynamics at work by invoking the sociological concept of 'scripts'.

A jointly authored article in which we draw upon personal experience to examine the role of the researcher's background in migration research. The article is currently on reading lists at several universities worldwide.

Hints and tips

Writing the CV

- Remember that the CVs/Track Records are as important as the project!
- Explain what your own contribution to your key publications has been
- Explain publishing habits in the field and country if needed.
- If the PI knows that he/she has gaps or other issues in the CV, explain them.
- Describe activities which can indicate scientific maturity.
- Follow the CV template provided by the ERC in the submission system.

Take-home message

- No te excluyas de participar en las convocatorias de ERC porque pienses que no tienes un CV competitivo aún.
- Si crees que tienes una gran **idea que supondrá un cambio significativo en tu campo de investigación o en alguna otra área**, considera la posibilidad de escribir una propuesta y enviarla al ERC.
- Durante la ideación de la propuesta: asume riesgos (te darán 1,5-2,5 M€!), explica el alto impacto científico de tu proyecto en caso de alcanzar los objetivos y proporciona evidencias de que puedes ejecutar este trabajo.
- Planifica tu propuesta ERC con tiempo (mucho tiempo: 9 meses, ideal).
- Si no te sale a la primera, vuelve a intentarlo.
