

Introduction and calling attention

The most important thing is to remember that at the best there will be two experts in your área in the panel Therefore you need to capture the attention of the panel with your first couple of sentences,

- Why is this exciting
- Why this can only be done by a team

Showing the team spirit

- Everyone in the team should participate in the presentation, there could be a leader orchestrating but allow everyone to present a slide at least.
- Be Enthusiastic
- When the panel asks questions allow more than one member replying them, you could discuss before to which kind of questions a team member will answer.

Showing the team complementarity (This is not an ERC starting, consolidator or Advanced)

Remember this is a Synergy grant, you need to demonstrate

- That the Project cannot be done by any of you alone
- That all members are needed and that there will be synergism from day one

Do many rehearsals with People not necessarily in the field
