- **Convocatoria “Call for tenders” Proyecto de seguridad PREVENT PCP:**

PREVENT PCP - The Tender has been issued!

Automatic detection and tracking of unattended items in public transport

The PREVENT PCP Contract Notice
Published on the 10th June 2022

Attention to all providers of:

- AI-based Video Analytics solutions
- AI-based identification and tracking systems
- Tech integration in standard crisis management systems and Video Management System

Available Budget: EUR 9,3 million

The graphic features a blue background with white and yellow text. On the right, there is a photograph of a blue suitcase in a public transport station with a person walking in the background. A circular graphic overlay is centered on the suitcase.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101020374

We have some exciting news for all providers who specialize in AI-based Video Analytis, identification and tracking tools, and tech integration in standard crisis management and video management systems.

The first PAN European Public Transportation Innovation Procurement Tender has been issued.

The PREVENT PCP Contract Notice has already been published in the [Tenders Electronic Daily \(TED\)](#) and is available **at this link** :
<https://ted.europa.eu/udl?uri=TED:NOTICE:322919-2022:TEXT:EN:HTML&src=0>.

This document will provide you with all pertinent information regarding the PCP process planning as part of our European project funded by the EU's Horizon 2022 Program.

Pre-Commercial Procurement (PCP) is a method for public buyers to acquire research and development services (and, under certain conditions, related R&D results), which involves competitive development in stages, risk-benefit sharing under market conditions, and a clear separation between the PCP and the deployment of commercial volumes of end products. PCP's goal is to direct the development of new innovations toward the needs of public buyers.

Over EUR 9 million will be invested in AI-based technologies for public transportation safety.

Participate and collaborate with us to improve public safety - [Reach out](#) or visit the [PREVENT PCP website !](#)

Para más información, ver anexo 1.

- **Open Market Consultation Drug detect project:**

We would like to invite you to the upcoming Open Market Consultation that the DrugDetect project is organizing physically on July 7th, 2022 in Brussels, Belgium and virtually on 12-15 July 2022!

The DrugDetect is an innovation procurement European project for drug detection in correctional institutions and prisons. The project is co-funded by the COSME programme of the European Union and kicked off in January 2022 with 36 months duration. The major project's aim is to procure an innovative solution for the automatic detection of a large range of drugs in correctional institutions and prisons, that is available 24/7, does not cause delays in internal processes, does not require minimal human intervention, and is GDPR compliant.

All interested organizations, buyers as well as suppliers, from various European countries, should be part of this event, having the opportunity to discuss new technologies, innovative

solutions and find qualified European suppliers during plenary sessions and one-to one meetings.

Innovate with us and register for the event in the following link: <https://ddc2022.b2match.io/home>

In case you are looking for partnerships or have any further queries do not hesitate to contact us at: drugdetect_procurement@kemea-research.gr

Para más información, ver anexo 2.

Esperamos que esta información os resulte de interés. Un cordial saludo,

Maite Boyero Egido

Horizon Europe Matchmaking Opportunity *Cybersecurity*

You are invited to join an exclusive Virtual Matchmaking Round Table for Israeli and European cybersecurity innovators and build a winning Horizon Europe consortium - up to €5.5M

The table will focus on:

ICT products, services and processes

Monitoring of threats, intrusion, detection & response

Vulnerable, insecure hardware & software components

Why Join?

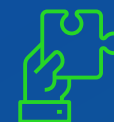

Financial support to create a winning bid

Pitch your organization to hand picked, experienced and influential participants

Access to EIT and ISERD's broad network in Israel and Europe

Organic and effective matchmaking to form your consortium

Who?

- SMEs
- Research institutes
- Industry players
- Startups
- Tech Companies
- MNCs

When?

Wednesday | July 6th 2022

10:00 - 12:00 CET | 11:00 - 13:00 IDT

What's the Agenda?

- 10:00 - 10:20 CET > Horizon Europe topic overview & tips for a winning bid
- 10:20 - 11:30 CET > Introduce yourself: 3 minute pitch for each organization
- 11:30 - 11:50 CET > Practical consortium case study and interactive discussion
- 11:50 - 12:00 CET > Q&A, next steps, summary

More details & registration >>

DrugDetect Project
Open Market Consultation

7th July
& 12th - 15th July

2022
Brussels Belgium

Dear Sir/Madam,

We are pleased to invite you to the upcoming physical and virtual event organized by the **DrugDetect** consortium, which will take place on **July 7th, 2022**, and on **12-15 July 2022** in **Brussels, Belgium**.

What is DrugDetect?

The DrugDetect is an innovation procurement European project for drug detection in correctional institutions and prisons.

The project is co-funded by the COSME programme of the European Union and kicked off in January 2022 with 36 months duration. The major project's aim is to procure an innovative solution for the automatic detection of a large range of drugs in correctional institutions and prisons, that is available 24/7, does not cause delays in internal processes, does not require minimal human intervention, and is GDPR compliant.

DrugDetect is addressing a need that is widely shared by prisons throughout Europe and in this context the project has gathered a representative, geographically balanced consortium of 4 public buyers (**KEMEA, DJI, DG-EPI, ESMIR**) from 4 European countries (Greece, Netherlands, Belgium, Spain) with together an average inmates population of 40.000.

Why attend the DrugDetect Open Market Consultation?

This event aims to bring together all interested organizations, buyers as well as suppliers, from various European countries, giving them the opportunity to discuss new technologies, innovative solutions and find qualified European suppliers during plenary sessions and one-to one meetings.

During this event DrugDetect Consortium will be discussed the legislation which creates opportunities and restrictions in various countries, the use cases of the desired equipment, the procurement process, the capabilities of companies to deliver and innovative features of the detection solutions.

We are not just looking for your participation, but we also strongly invite you to become a part of this process as one of the main drivers for this crucial foundation step. The innovation potential identification, through an interactive process, will be a primary objective that will pave the way to establishing the new requirements, forming the specifications, and eventually resulting in a highly competitive Call for Tenders

Registration

It will be our great honor to have you as our guests and we hope you accept the invitation to attend this important event.

You are more than welcome to forward this announcement to any interested parties.

For more information about registration, the agenda, and the day schedule please follow: <https://ddc2022.b2match.io/home> and the project's social media pages for any updates:

Twitter: https://twitter.com/detect_drug

LinkedIn: <https://www.linkedin.com/company/drugdetect>

In case you are looking for partnerships or have any further queries do not hesitate to contact us at: drugdetect_procurement@kemea-research.gr

Thank you for considering our invitation and we are looking forward to seeing you in our Open Market Consultation.

kindest Regards,
the DrugDetect Consortium
