# ERC The Scientific Council

The Scientific Council is composed of 22 eminent scientists and scholars.

**Mission:** Scientific Strategy, Quality control of evaluation process, communication Strategy.

The members are appointed by the EC, on the recommendations of an independent Identification Committee.

The term of office of the members of the Scientific Council is limited to 4 years, renewable once.

## Legal documents

## The ERC Executive Agency (ERCEA)

Implementation of the calls for proposals, management of the grants

# What is European Research Council mission?

The ERC is based on a simple idea:

ERC supports the **best researchers** to work in Europe on their **best ideas**.

The sole criterion for selection is **scientific excellence**.

Life Sciences

Physical Sciences and Engineering

Social Sciences and Humanities

Abierto a investigadores/as de **todo el mundo**

Proyectos **individuales** de larga duración

Sin prioridades temáticas (**Bottom up**)

Investigación de frontera, en cualquier campo científico

Único criterio de evaluación: **excelencia científica** de la propuesta de investigación y del investigador principal

Evaluación por científicos de alto prestigio internacional

Ofrece al personal investigador:

\* *Independencia*   \* *reconocimiento*   \* *visibilidad*

# ERC Consolidator Grant

Support for excellent Principal Investigators at the career stage at which they may **still** be **consolidating** their **own** independent **research team** or programme.

Principal Investigators must...../.....

.....demonstrate the ground-breaking nature, ambition, and feasibility of **their research proposal**.

..... should have **already shown** evidence of research independence.

## Requirements:

- PhD >7 and  $\leq$  12 years \*
- Devote at least 40 % of their working time to the ERC-Starting Grant project
- Spend at least 50% of their working time in EU/AC

# ERC StG 2024 Cut-off dates & extensions

**Eligibility period:** Principal Investigator(s) who have successfully defended their first PhD

**> 7 and ≤ 12 years**  
**prior to January 2024**

**Cut-off dates:** Successful defence of PhD between 1 January 2012 and 31 December 2016 (inclusive)

## **Circumstances for extension:**

- **Maternity:** 18 months extension for each child born before or after the PhD award. Longer maternity leave may be taken into account.
- **Paternity:** elapsed time of paternity leave taken until the call deadline for each child born before or after the PhD award.
- **Long-term illness or national service:** amount of leave taken by the Principal Investigator until the call deadline for each incident which occurred after the PhD award date.
- **Clinical training:** amount of clinical training received by the PI after the award of the first eligible degree and until the call deadline, up to a maximum of 4 years.
- **seeking asylum:** inability to work before the call deadline and after PhD.
- **being a victim of a natural disaster:** inability to work before the call deadline and after PhD.

# PhD reference date

**! WP2023:** PhD reference date for the calculation of the eligibility period from the date of the actual award according to the national rules of the country where the degree was awarded to the date of the successful PhD defence.

De acuerdo con el **Real Decreto 1002/2010, de 5 de agosto, sobre expedición de títulos universitarios oficiales, en su artículo 3, punto 4 establece lo siguiente:**

4.Los títulos universitarios oficiales, expedidos de conformidad con lo previsto en este real decreto, surtirán efectos plenos desde la fecha de la completa finalización de los estudios correspondientes a su obtención.

La fecha de expedición del título se corresponde con la fecha de abono de las tasas para su expedición. **La legislación española dice**, por tanto, **que es la fecha de** completa finalización (cumplimiento del último de los requisitos = **día de lectura**), no el de expedición, **lo que hay que considerar.**

<https://www.boe.es/buscar/doc.php?id=BOE-A-2010-12621>

Por tanto, para el caso de los títulos de PhD expedidos en España, no cambia nada. **Se seguirá considerando el día de defensa del título, como hasta ahora.**

# ERC Consolidator Grant – Profiles

No prescriptive Principal Investigator profiles

New Curriculum Vitae and Track Record **template** (4 pages)

## Profile of the ERC Consolidator Grant Principal Investigator

A competitive Consolidator Grant Principal Investigator must have already shown research independence and evidence of maturity, for example by having produced several important publications as main author or without the participation of their PhD supervisor. Applicant Principal Investigators should also be able to demonstrate a promising track record of early achievements appropriate to their research field and career stage, including, e.g. significant publications as main

author) in major international peer-reviewed multi-disciplinary scientific journals, or significant publications in the leading international peer-reviewed journals of their respective field, or research monographs. They may also demonstrate a record of invited presentations in well-established international conferences, granted patents, awards, prizes, or any other scientific achievements they deem relevant in relation to their research field and project.

## WP 2023

### Early achievements track record

In the Track Record (see "Proposal description"), the applicant Principal Investigator should list (if applicable, and in addition to any other scientific achievements deemed relevant by the applicant in relation to their research field and project):

1. Up to ten publications in major international peer-reviewed multi-disciplinary scientific journals and/or in the leading international peer-reviewed journals, peer-reviewed conferences proceedings and/or monographs of their respective research fields, highlighting those as main author or without the presence as co-author of their PhD supervisor (properly referenced, field relevant bibliometric indicators<sup>24</sup> may also be included); preprints may be included, if freely available from a preprint server (preprints should be properly referenced and either a link to the preprint or a DOI should be provided);
2. Research monographs and any translations thereof;
3. Granted patent(s);
4. Invited presentations to internationally established conferences and/or international advanced schools;
5. Prizes, awards, academy memberships.

Starting Grant	Consolidator Grant	WP 2024
A competitive Starting Grant Principal Investigator should have already shown evidence of the potential for research independence, for example by having produced at least one important publication as main author or without the participation of their PhD supervisor.	A competitive Consolidator Grant Principal Investigator should have already shown evidence of research independence.	

# ERC Consolidator Grant- HOST Institution

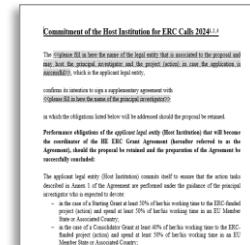

Any type of **legal entity**, private or public (universities, research centres, industry, ... )  
Based in one of the **EU Member States**, or one of the **Associated Countries**.

The PI does not necessarily need to be working at the Host Institution at the time when the proposal is submitted.

HI is **not an evaluation criteria**, but a **HI commitment letter** is needed.

Host Institution:

- Must **host and engage** the PI for the whole duration of the action
- Must **guarantee** the PI **scientific independence**
- Must provide research support and administrative assistance (if granted)

Signature of the Grant Agreement

Signature of a Supplementary Agreement with the PI

## Gender Equality Plan

The organization must have a Gender Equality Plan (GEP) at the time of signing the grant agreement

# ERC Consolidator Grant – Funding and Budget

Up to **[2] million euros for 5 years** (60 months)

**Additional funding up to 1M€** when these are necessary to carry out the proposed work:

- **"start-up" costs** for PIs moving to the EU or an Associated Country from elsewhere as a consequence of receiving the ERC grant and/or
- the **purchase of major equipment** and/or
- **access to large facilities** and/or
- other **major experimental and field work** costs, excluding personnel costs.

**All funding requested is assessed during evaluation.**

These costs are justified separately in the proposal.

There **is no definition of “equipment” or “facilities”** and all requests will be evaluated by the peer review panel.

# Additional funding examples

Consolidator Grant - Up to **2 million euros for 5 years** (60 months)

+ **Additional funding** up to **1M€** when these are necessary to carry out the proposed work

*Additional funding: could you give concrete examples for all three main domains what could be financed by this budget?*

(d) other major experimental and field work costs, excluding personnel costs	High amount of consumables to perform experiments	Specific tasks to be subcontracted (building of parts for satellites)	

# ERC Consolidator Grant-BUDGET

An ERC grant can cover up to **100% of the total eligible direct costs** of the research **plus 25%** contribution towards **indirect costs**.

- A. **Direct personnel costs** (Principal Investigator, senior staff, post docs, students, other personnel costs).
- B. **Subcontracting costs** (no indirect costs).
- C. **Purchase costs** [travel and subsistence, equipment (including major equipment), consumables (including fieldwork and animal costs), publications (including any costs related to Open Access fees) and dissemination, and other additional direct costs].
- D. **Internally invoiced goods and services** (no indirect costs).

#### Section C: Resources (Maximum 8000 characters allowed)

This section and the budget table will be made available to the experts evaluating the proposal at Step 2. Therefore, your description of resources will be truncated once it exceeds the maximum allowed characters. Please make sure that your description is complete before submitting.

Start and End: Indicate the amount of budget considered necessary to fulfil the objectives for the duration of the project. The project cost estimation should be as accurate as possible. The evaluation panel assess the estimated costs carefully. Unjustified budgets will be consequently reduced. Please specify if you will use third parties giving in-kind contributions to the action.

If applicable, please specify the cost items covered by your 'Other personnel costs' category and the cost items covered by your 'Other additional direct costs' category.

Request for additional funding (if applicable) (All items MUST be included in the overall budget table above). (Cost in EUR)

Proposal summary (identical to the abstract from the online proposal submission forms, section 1)

The abstract (summary) should, at a glance, provide the reader with a clear understanding of the objectives of the research proposal and how they will be achieved. The abstract will be used as the short description of your research proposal in the evaluation process and in communications to contact in particular potential independent external experts and/or to inform the Commission and/or the programme management committees and/or relevant national funding agencies. It must therefore be short and precise and should not contain confidential information.

Please use plain typed text, avoiding formulae and other special characters. The abstract must be written in English. There is a limit of 2000 characters (spaces and line breaks included).

Explain and justify the cross-panel or cross domain nature of your proposal, if a secondary panel is indicated in the online proposal submission forms. There is a limit of 1000 characters, spaces and line breaks included.

# ERC 2024 –Evaluación y Paneles

There are in total **28 panels**, divided between three main domains:

- Physical Sciences and Engineering (PE) with 11 panels
- Life Sciences (LS) with 9 panels
- Social Sciences and Humanities (SH) with 8 panel

**Each of the 28 panels is composed by 12-18 panel members.**

**More than 450 panel members per call and year!**

The **panel chair** is known during the evaluation however the composition is made public once the results are published.

A panel may not include an expert in your discipline , they are semi-generalists , but! ERC can establish collaborations between panels...

The members of ERC panels alternate to allow panel members to apply to the ERC calls in alternate years.

# Restricciones para el envío de propuestas

- Restriction related to PIs holding an ongoing grant (except PoC) must end within 2 years after the call deadline
- Restrictions for PIs who served as panel members under previous calls apply.
- A researcher, whose proposal has been selected for funding and who is preparing a grant agreement under a 2023 ERC call, may not apply for a Starting, Consolidator, or Advanced Grant under a 2024 ERC call.

**Applicants may also be subject to restrictions on submitting proposals to future ERC calls based on the outcome of the evaluation. Applicants will need to check the restrictions in place for each call**

# Criteria de Evaluación

## Principal Investigator

### Intellectual capacity and creativity (B1)

- demonstrated the ability to conduct ground-breaking research?
- evidence of creative independent thinking?
- required scientific expertise and capacity to successfully execute the project?

## Research Project

### Ground-breaking nature, ambition and feasibility (B1+B2)

- Does the proposed research address important challenges?
- Are the objectives ambitious and beyond the state of the art?
- Are there novel concepts and approaches or development between or across disciplines?
- Is the proposed research high risk-high gain?

### Scientific Approach

- Is the outlined scientific approach feasible...~~high risk/high gain~~ bearing in mind the ground breaking nature and ambition of the proposal? (B1)
- Are the proposed research methodology and working arrangements appropriate? (B2)
- Does the proposal involve the development of novel methodology? (B2)
- Are the proposed timescales, resources and PI commitment adequate? (B2)

# Competitive Profile?

## Evaluators say:

- CLARITY: Vague information won't help you.
- QUALITY vs QUANTITY
- The track record must be in line with the proposed research
- Numbers are ok but explain your contribution
- EXPLAIN: The panel members may not know if your merits are relevant or not (prizes, grants, journals...)
- Post-doctoral stays: CLARITY
- Contribution at each career step: explain gaps

## Most common errors:

- Lack of coherence between your track record and your proposal.
- Core competences missing (and you don't give any solution)
- Not structured/selected info

# DO NOT EXCLUDE

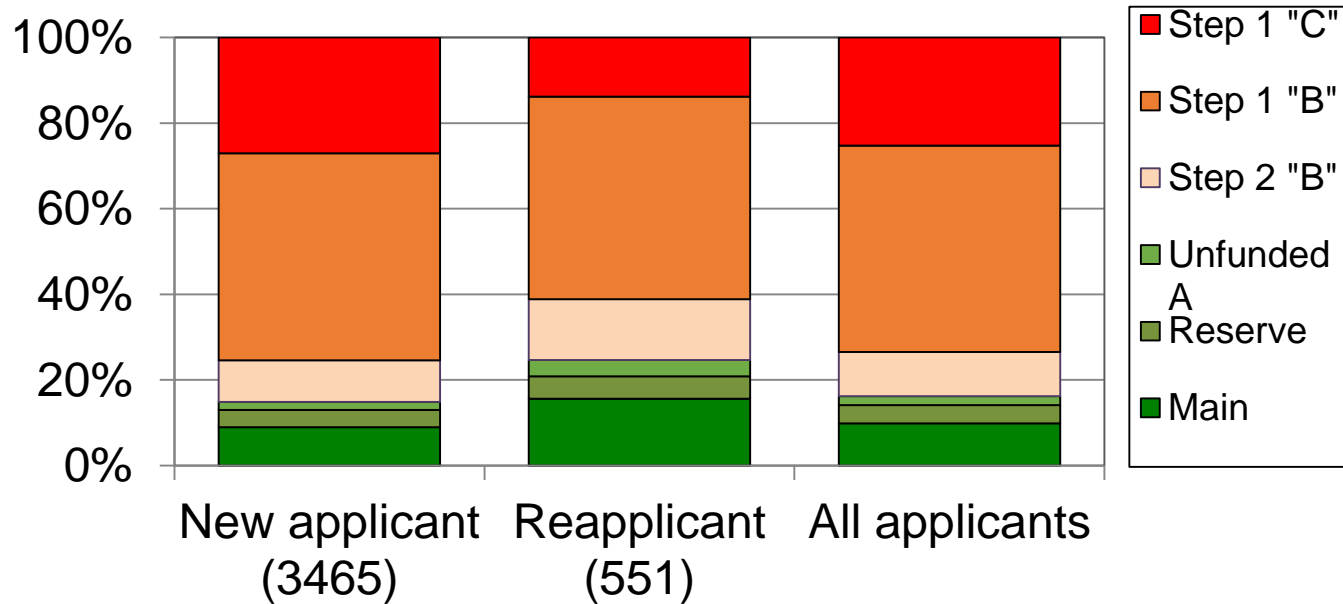

## Yourself from participating in ERC calls

- **Take risks**, explain your project's high scientific impact if you reach your aims, and **provide evidence that you can do it**.
- **If you fail, try again!** Gain experience from evaluation. Panel feedback is useful and resubmissions have higher success rate.

*Note:* In my field, the top conferences are ACM CHI and ACM UIST. Publication in these conferences is considered as prestigious as in the top journals in the field (ACM TOCHI, IJHCS). I work collaboratively with students and colleagues. As the most senior researcher, my name is usually last in the list of authors. However I only co-sign papers for which I have substantially contributed to both the work and the writing.

**SELECTED ACHIEVEMENTS**

**PREMIG**  
Possibilities and Realities of Return Migration  
An international research project 2011-2014

Front-page feature on international migration in *The New York Times* based on my PhD research (2007)

Award of largest-ever project grant in the welfare research area of the Research Council of Norway (2010)

Co-editing the 50th Anniversary Issue of the *International Migration Review*, the most prominent journal in my field (2014)

Discovery of 'scripts' as a conceptual tool for making sense of the social dynamics of remittances (2014)

Invitation to serve as expert panellist on migrant smuggling, United Nations, Vienna (2017)

### *Selected publications in leading peer-reviewed journals and selected book chapters*

*Journal rank quartile from ISI Web-of-Science Journal Citation Reports if available; in all other cases, journal category from European Science Foundation ERIH Initial List: Linguistics (2007)*

- M. **Baroni** and A. Lenci. To appear. Distributional Memory: A general framework for corpus-based semantics. *Computational Linguistics*. Journal ranked in Q1 of *Linguistics* and *Computer Science, Interdisciplinary Applications*. Citations: 1. Here and in the Cognitive Science paper below, I introduce a new corpus-based semantic model of word meaning that adapts flexibly to multiple semantic tasks and shares interesting properties with human semantic cognition. The model and its extensive evaluation work reported in these articles will constitute starting points for COMPOSES model and evaluation.
- G. Kremer and M. **Baroni**. To appear. A set of semantic norms for German and Italian. *Behavior Research Methods. Journal ranked in Q1 of Psychology, experimental and Psychology, mathematical*. Citations: 0.
- M. **Baroni**, B. Murphy, E. Barbu and M. Poesio. 2010. Strudel: A corpus-based semantic model based on properties and types. *Cognitive Science* 34 (2): 222-254. Journal ranked in Q1 of *Psychology, experimental*. Citations: 9.
- V. Pirrelli, E. Guevara and M. **Baroni**. 2010. Computational issues in compound parsing. In S. Scalise and I. Vogel (eds.), *Cross-disciplinary issues in compounding*. Amsterdam: Benjamins: 271-286. Citations: 0.
- M. **Baroni**, S. Bernardini, A. Ferraresi and E. Zanchetta. 2009. The WaCky Wide Web: A collection of very large linguistically processed Web-crawled corpora. *Journal of Language Resources and Evaluation* 43 (3): 209-226. ERIH B category (formerly *Computers and the Humanities*, ERIH A category). Citations: 28. The corpus construction and annotation work described here has recently been extended with a full dependency parse of the English corpus and of the English Wikipedia. The resulting enlarged corpus will constitute the main data source of COMPOSES.
- M. **Baroni**, E. Guevara and R. Zamparelli. 2009. The dual nature of deverbal nominal constructions: Evidence from acceptability ratings and corpus analysis. *Corpus Linguistics and Linguistic Theory* 5 (1): 27-60. ERIH C category. Citations: 1. We study a linguistic problem by combining corpus data, Web-collected graded linguistic judgments and advanced statistical analysis (mixed effect linear models). We will apply similar elicitation and analysis techniques in COMPOSES.

ALiEN  
Marco Baroni  
ERC-2020-ADG

[ALiEN \(marcobaroni.org\)](http://marcobaroni.org)

- Intelligence Research* 49, 2017 IJCAI-JAIR best paper prize for the preceding 5 years (644).  
**Significance:** *The pioneering work of my team on learning multimodal concept representations from visual and textual data is summarized in this article.*
- M. Baroni, G. Dinu and G. Kruszewski. 2014 Don't count, predict! A systematic comparison of context-counting vs. context-predicting semantic vectors. *Proceedings of ACL* (1322). **Significance:** *This was one of the first papers demonstrating the power of new-generation neural-network-based word embeddings, proposing several tests that became standard in the community.*
- T. Mikolov, A. Joulin and M. Baroni. 2016. A roadmap towards machine intelligence. *Proceedings of CICLing* (90). **Significance:** *An extended "vision" paper on the central role of communication for flexible AI.*
- A. Lazaridou, A. Peysakhovich and M. Baroni. 2017. Multi-agent cooperation and the emergence of (natural) language. *Proceedings of ICLR* (201). **Significance:** *One of the first papers studying language emergence among DNNs processing realistic visual input. The literature it spawned constitutes the starting point of ALiEN.*
- B. Lake and M. Baroni. 2018. Generalization without systematicity: On the compositional skills of sequence-to-sequence recurrent networks. *Proceedings of ICML* (155). **Significance:** *Paper associated to a successful benchmark that has inspired recent research on DNN linguistic generalization abilities.*
- A. Conneau, G. Kruszewski, G. Lample, L. Barrault and M. Baroni. 2018. What you can cram into a single \$&!#\* vector: Probing sentence embeddings for linguistic properties. *Proceedings of ACL* (234). **Significance:** *One of the earliest and most influential papers probing the continuous representations developed by DNNs for linguistic knowledge.*
- M. Baroni. 2020. Linguistic generalization and compositionality in modern artificial neural networks. *Philosophical Transactions of the Royal Society B* 375 (20). **Significance:** *Invited paper in a prestigious journal venue in which I take stock of my research on generalization in DNNs, suggesting, in the ALiEN spirit, that taking a too human-centric view of DNN language might be counterproductive.*
- R. Chaabouni, E. Kharitonov, D. Bouchacourt, E. Dupoux and M. Baroni. 2020. Compositionality and generalization in emergent languages. *Proceedings of ACL* (2). **Significance:** *Very recent paper exemplifying my ongoing work on DNN emergent language, with a focus on generalization.*

## Research Achievements $\leq 10$

*the importance of narrative!*

### PhD period

*“Magnetic polyoxometalates: Anisotropic exchange interactions in the  $Co_3(II)$  moiety of  $[(NaOH)_2Co_3(H_2O)(P_2W_{15}O_{36})]^{17-}$ ”*

J. M. Clemente-Juan *et al.*, *Inorg. Chem.* **2005**, 44, 3389

[cites: 54]

This work, representative of my PhD, focused on the use of Inelastic Neutron Scattering to characterize the exchange in transition metal ions.

### Intraeuropean postdoctoral period

In this period I produced my **first scientific breakthrough**, on the topic of using magnetic molecules as quantum bits and quantum gates:

*“Spin qubits with electrically gated polyoxometalate molecules”*,

J. Lehmann *et al.*, *Nature Nano.* **2007**, 2, 312

[cites: 164]

J.L. and I equally contributed to the main ideas of the paper. This proposal built upon the theoretical work performed by M.A.A., who was my first PhD student. **It is having a high impact in the nascent field of the molecular nanospintronics.** This work was highlighted in the cover of the journal, and also by a “News and Views” article entitled “Quantum information: High fidelity” and is considered a “highly cited paper” according to ISI Web of Knowledge (over 20 cit./year). I was invited to give a lecture about this work by the European Materials Research Society in 2008.

### Extraneous postdoctoral period

In this period I was invited to participate in a special issue of Journal of Materials Chemistry on Molecular Spintronics, resulting in the next two publications:

*“Quantum computing with molecular spin systems”*,

J. Lehmann *et al.*, *J. Mat. Chem.* **2008**, 19, 1672

[cites: 50]

*“Spin-based quantum computers made by chemistry: hows and whys”*,

P. C. E. Stamp and A. Gaita-Ariño, *J. Mat. Chem.* **2008**, 19, 1718

[cites: 61]

The feature article I wrote together with PCE Stamp, my postdoctoral supervisor, was aimed to guide chemists to the design of molecular spin qubits. This work was a central result of **my self-driven Marie Curie project** “Decoherence in magnetic molecules as qubits” which funded my research both in Vancouver (during 2 years) and in Valencia (the third year). **This project also consolidated my previous breakthrough in the field and resulted in the opening of a new line of research in the ICMol in Valencia.** This work will serve

MACHINE VISION

### Section c: Early achievements track-record

#### Highlights:

- Field builder: consistently first or among first to research new digital phenomena from a humanities perspective, including blogging (2002), transmedia/distributed narrative (2005), selfies (2005, 2014), self-tracking (2014) and now machine vision (2016).
- **Author of the first academic paper on blogging** ("Blogging thoughts: personal publication as an online research tool", with Torill Mortensen, in A. Morrison (ed.). *Researching ICTs in Context*. Oslo: InterMedia Report, 2002. GS: 376 citations.).
- Author of the most cited book on blogging (*Blogging*, Polity Press 2008, 2014. GS: 417)
- Pioneering research blogger: started blogging at jilltxt.net in October 2000, and am still active.
- **First in humanities to use Snapchat to disseminate research** (see feature story, *Chronicle of Higher Education*, 27.04.2016; google Snapchat Research Stories for select YouTube archive)
- Winner of Inaugural Ted Nelson Prize for Best Paper by a Newcomer to the ACM Hypertext Conference for a paper written while I was still an MA student. Won prestigious Norwegian Research Council stipend that fully funded my PhD.
- Winner of Meltzer Award for excellence in Research Dissemination, 2006 (NOK100,000/€12000)

#### Summary of publications

According to Google Scholar, my work has been cited 2092 times as of 7 Feb 2016. My h-index is 19. I have published two monographs and co-edited one anthology, all on top-ranked academic presses: Polity, Palgrave and MIT Press. I have published 19 book chapters and 12 journal articles. All but two book chapters and one journal article were single-authored. I also have three further book chapters completed and in press, two more accepted and in stages of revision, and one journal article in review after revision. For a full list of publications, please see <http://jilltxt.net/txt/JWR-CV-Jan-2017.pdf> or my profiles on Google Scholar, Academia.edu or ResearchGate.

#### Research monographs and translations thereof. Google scholar citations in bold.

(110) *Seeing Ourselves Through Technology: How We Use Selfies, Blogs and Wearable Devices to See and Shape Ourselves*. Basingbroke: Palgrave, October 2014.

*The first scholarly monograph to thoroughly discuss selfies, and one of first to discuss self-tracking. Compares different modes of digital self-representation: visual (e.g. selfies) written (e.g. blogs and online diaries), and quantitative, as generated by self-tracking apps.*

(421) *Blogging*. Cambridge: Polity Press, 2008, 2<sup>nd</sup> ed. 2014. (First edition trans. to Polish, Korean.)

*The most cited book on blogging, offering historical and theoretical context to understand blogs, and specific analyses of narrative blogs, journalism and blogs and commercial blogs*

### Additional information:

- career breaks, diverse career paths, life events
- other contributions to research community

The applicant may also include relevant information on, for example, **career breaks, unusual career paths, as well as any particularly noteworthy contributions to the research community.**

These will not in themselves be evaluated but are important to provide context to the evaluation panels when assessing the principal investigator's research achievements and peer recognition in relation to their career stage.
